

## **Webmaster Report**

### **Introduction**

This report will cover the ongoing website re-development, problems encountered with the ICCF website, statistics on visitors to the ICCF website.

Firstly though I must thank the ICCF President Eric Ruch for being available to assist with the design/development and testing of the new website, exspeically when our Service Director became unavailable.

The offers of help from Michael Millstone and Jean-Christophe Chazalette have also been most welcome.

### **Website Re-Development**

The progress on the new website slowed over the past year firstly with the Service Director beoming unavailable and secondly through the failure of the graphic designer to delivery what they had promised.

With the above problems aside a new website has been designed and is currently is in testing.

### **Current ICCF Website**

The current website is still functioning though there have been issues with the age of the software used, and the lack of a useful help feature to assist new users to the ICCF website when they are posting information to the site.

### **Server Statistics**

The following statistics show the number of visits, which websites are referring traffic to the ICCF and which type of browsers the ICCF website visitors are using.

Based on the number of visitors the ICCF website receives and these figures do not include visitors to the Web-Server the ICCF.

## Sub-Domains

Both the Tables and Champions League sub domain; currently they are in the same sub-domain which as we move to the new website they will be split into two different sub-domains. This will allow for more detailed reporting on the 2 sites.
